

Patio Heater VARIOMAX

Design & Performance

Summer feelings
from GoGaS

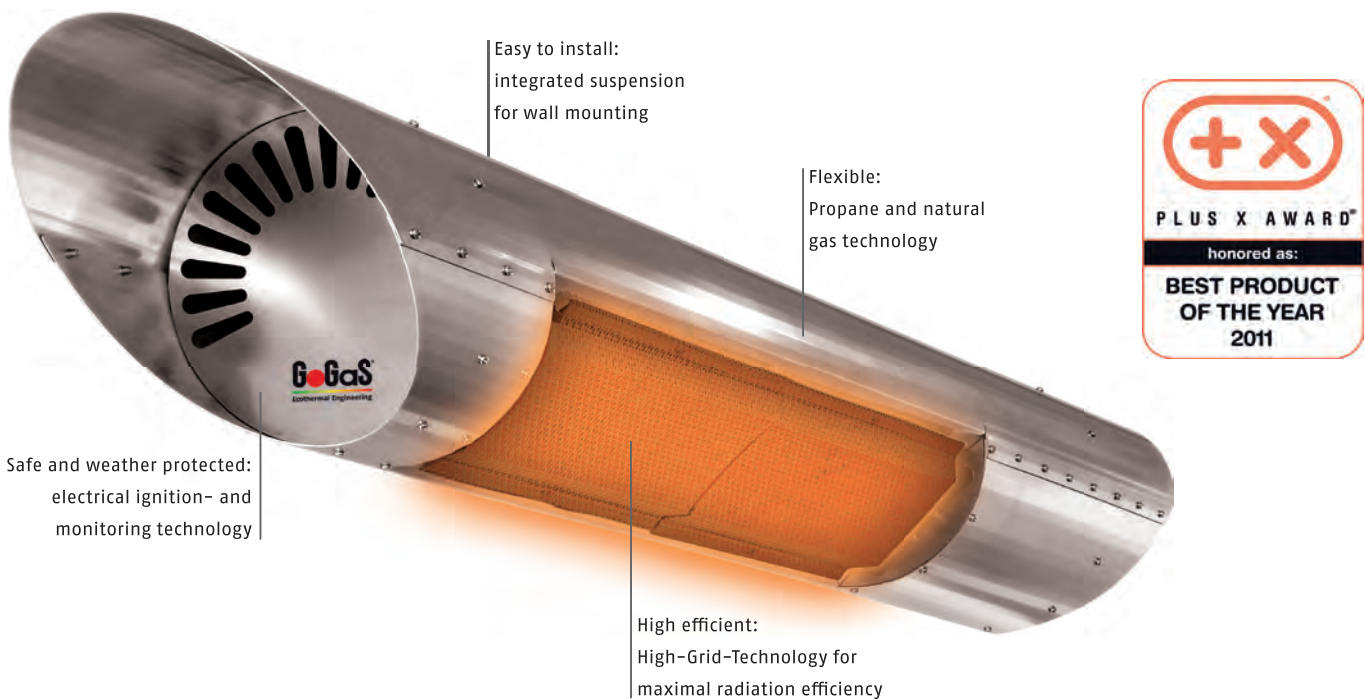

VARIOMAX.

Energy efficient premium solution for heating of representative terraces

As an expert of high efficient gas infrared heating systems for soccer stadiums, industry and commercial halls, we are market leader since decades. With the help of this technology and our know-how we have developed VARIOMAX. The unique combination of technology and design convinces not only our customers: VARIOMAX was the winner of Plus X Award as „Best Product of the year 2011“. For VARIOMAX the look isn't everything – the corrosion resistant aluminium housing makes it wind- and weather resistant. The patio heater can be mounted directly on the outer wall of the building. You have the choice between the layouts for: gas-infrared (propane gas, natural gas), electrical or LED lighting object. Your guests will warmly advice you.

Technical Data & Facts

Technical Data

Type	Nominal heat load 1-stage / 2-stage kW	Length mm	Width mm	Height mm	Weight, approx. kg
VARIOMAX 6	3 / 6	1408	310	262	7
VARIOMAX 12	6 / 12	1778	310	362	17,4
